

Dear Toos and Board members, donors, and everybody involved

Last night I compiled a report on the waterdrilling process and options after we were not successful to find water at Ombyarundu and sent it to Toos Verbruggen, the chairperson of CTN.

This morning I received the good news from the me. Sarah, wife of the person in charge Mr Festus Mbware that the borehole that they already paid for and couldn't reclaim the money(see previous report) has been drilled and was successful with a good flow of water.

This is a delight. We wait now to hear what the exact capacity of water is. Then an example will be send to Windhoek to be tested whether it is healthy for human consumption. Then we can negotiate with the Mbware family to cooperate. Keep in mind that they initiated the pre-school at Omyarundu and have a heart for the local people, especially the children.

We just want to share the good news with you and will keep you update on further developments.

Blessings,
Jacob Schoeman

Board member of Connected to Namibia.
